

Crunch Chart

Make an Apple Availability Chart:

Ontario has so many wonderful apples to enjoy. Encourage your students to try them all by creating a chart showing each variety as well as the months they're available. Availability guides open great discussions around seasonality, growing conditions and the importance of biodiversity in agriculture.

To access a list of Ontario-grown apple varieties, their availability, as well as recipes and fun facts, visit the Ontario Apple Growers Association website: <http://www.onapples.com>.

In the meantime, here's an idea to get your creative apple juices flowing!
