

Indigenous

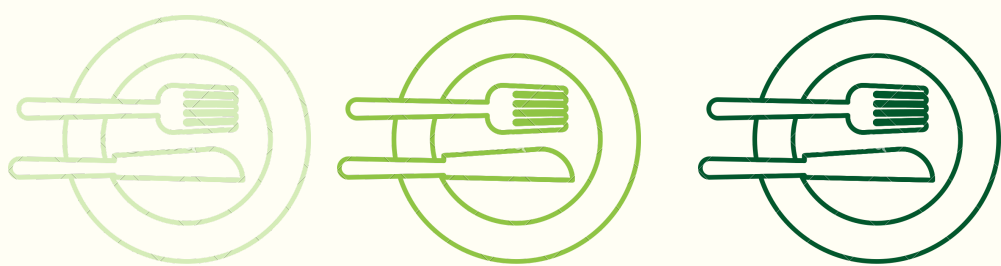

Food Insecurity

x 2

The rate of insecurity among Indigenous Peoples in Canada is more than double that of the general population.

One third of Indigenous households living off-reserve are food insecure.

48% of First Nations households on reserve have difficulty putting food on the table.

41% of Inuit Peoples aged 15+ live in food insecure households.

61

As of February 2020, there are 61 long-term drinking water advisories on reserves across the country.

This means that over 60 First Nations Communities do not have access to safe, clean drinking water.

Indigenous Peoples disproportionately experience higher rates of food insecurity as a result of colonial violence.
